Forecast for Thursday 20 May 2021

Weather: Dry through the early hours, but with medium and high cloud thickening from the west. Cloud thickening early Thursday with rain by mid-morning, this continuing through much of the day and into the evening, with some heavier bursts likely, and with a low risk of thunder in the evening.

Chance of cloud free mountain/hill tops above 600m: 95%, becoming 60%.

Visibility: A few mist patches possible around dawn, otherwise good or very good, becoming moderate or poor at times in rain, with patchy cloud 500-600m developing for a time around the middle of the day, and more especially in the evening.

Meteorologist's View

Some heavy bursts of rain, especially in the evening, and combined with strengthening winds will bring increasingly difficult conditions on the hills. Winds may be 10mph stronger than shown at 600m at times across highest peaks.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

Forecast for Friday 21 May 2021

Weather: Cloudy with showers or more prolonged outbreaks of rain through the early hours and during Friday. Some heavy and perhaps thundery bursts likely, but rain tending to ease through the evening.

Maximum wind: SW 35 gust 45mph through the early hours, becoming W 20 gust 30-35mph during the day.

Chance of cloud free mountain/hill tops above 600m: 60% becoming 30%.

Visibility: Good, becoming moderate occasionally poor in outbreaks of rain, with patchy cloud around 600m becoming more extensive and lowering 400-500m by evening as winds become northwesterly.

Temperature: **Valleys:** PS 08 C becoming PS 12 C

At 600m: PS 06 C

Freezing level: Above the summits
